

The Avery
Multi-Family
 Dallas, Texas

ZOM
 422 Units
 13.22 Acres
 32 units/acre

Located in Northeast Dallas between Northpark and White Rock Lake, The Avery replaced existing housing with 422 contemporary apartment units. The location provides for a product that is more than competitive with the existing multi-family housing in the area. A strong demographic of young professionals, students, and new families provide a consistent market for The Avery. Designed as an urban village, the project makes a strong statement on the street by placing the buildings to the street frontage and eliminating any views to the surface parking and carports in the back. The building's design and placement to one another creates numerous courtyard and seating areas, encouraging the residents to interact.
