

Gables Metropolitan II

Multi-Family • Urban Infill

Atlanta, Georgia

Gables Residential Trust
274 Units
6.1 Acres
44.92 Units/Acre

Gables Metropolitan II is a high-density development with 274 units. The five-story parking structure is hidden from the main entry. Phase II is designed to blend in with Phase I, yet also create a unique character. The main entry flanked by Phase I and Phase II creates an urban streetscape, terminating with a water feature in a courtyard. Front entries were introduced along the street to encourage activities and create an atmosphere between Phase I and II. Four unique, intimate courtyards were located at the opposite side of the street. The building separates the public area of the main drive and the semi-public courtyards.
