

Head Start-Child Care Center

Fort Hood, Texas

*Fort Hood Family Housing
3,200 sf
3 classrooms*

JHP provided design service for a 3-classroom 3,200 s.f child care center. The facility was originally funded to be operated from a portable building (double wide trailer). The developer brought a challenge to JHP. "Can a free-standing building be constructed for the same cost as the purchase of a portable building including finish-out for the final use?" JHP took the challenge and set out to design an efficient floor plan including the specification of residential grade materials and worked closely with the Owner to deliver a cost competitive facility which was an up-grade from the proposed double-wide trailer.
