

Vickery Meadow Improvement District Master Planning

Dallas, Texas

VMID & The Real Estate Council
200 acres

This study is seen as both an off-shoot of the Forward Dallas Comprehensive Plan effort as well as being part of the implementation/neighborhood-scaled planning component of Forward Dallas. The motivated and energetic Vickery Meadows Improvement District (VMID) took it upon themselves to commission and undertake this study as a private (non-city) effort. Our District Redevelopment Study first analyzed current conditions; from traffic, pedestrian, land usage to street patterns along with the social and demographic makeup of the neighborhood were all studied carefully.
